I had a horrendous experience last Saturday.

That day, my family went camping near a big lake. While my parents were preparing dinner, my brother and I were playing by the lake. A dirty man appeared from somewhere, and his face was half covered by his hair. He walked to us and asked for some water.

When I gave him water, the bag he carried dropped, and things inside fell out on the grass. I saw a rope, a knife, and a baseball bat. The strangest thing was that there were also a woman's shoe and a ring, and I'm sure they were not his. The man quickly put all his things back in the bag and looked at us angrily. At that moment, the picture of a man the police was looking for came to my mind. He was the crazy killer! I was so afraid that I could not move at all.

Luckily, before he could get any closer, my mom shouted from far away, and the man hurried off into the dark.

When you need to see a doctor, surely you will want to see a good one. But there is one important thing you may never have thought about: Has your doctor rested enough?

Doctors in our country often have to work 34 hours or longer without sleep. Most of them work 104 hours a week, and some even 150. (There are only 168 hours a week!) One report said that a doctor who works such long hours cannot think more clearly than a drunk driver. Another found that doctors who sleep 5.8 fewer hours than the week before might make 22% more serious mistakes. Surely no one wants to get in a car that is driven by a drunk driver. So, how safe would you feel when you are under the care of a tired doctor?

Sadly this problem has been around for a long time. There are no laws about it yet and hospital bosses don't look like they care either. And that is why we doctors are asking you to join us on the street this Sunday. Fight together with us on the street so we can fight better for your life in the hospital.
